Business Coaching

A study conducted by Michigan-based Triad Performance Technologies, Inc. (on the ROI of working with a business coach) cites a 10:1 return on investment in less than one year.

A Business Coach is an expert in various areas and processes of small and medium size businesses. He or she is a professional who studies what makes a business owner successful. In practice, a coach takes the time to understand the owner's business completely and provides systematic development strategies that help the owner reach his or her goals. A Business Coach works to develop the whole business on a continuous basis, in contrast to a consulting engagement where expertise is typically focused on a specific stand-alone issue. A good Business Coach is a skilled mentor in the development of areas such as leadership skills, marketing systems, sales training systems, development of customer service systems, human resources, and financial analysis.

We at TITAN Business Development Group, LLC see our role as that of Trusted Advisor. The traditional advisors to business owners are usually accountants and attorneys. These professionals focus mainly on compliance. Accountants focus largely on financial matters such as ensuring that financial statements are prepared in accordance with GAAP and that tax returns are filed in accordance with tax regulations. Attorneys are focused on legal matters, ensuring the correct business entity is selected and the various legal issues encountered in the regular course of operations are dealt with in a timely manner. However, business owners do not meet with these advisors regularly. At TBDG, quite the opposite is true. We meet with our clients regularly (often weekly) and are always available by phone, video conference and email. During these ongoing, regularly scheduled meetings, business owners learn strategies and apply them to their business now. This constant contact ensures accountability and fosters dynamic, continuous progress, which creates incredible momentum! At TBDG we concentrate on moving the business to where the owner wants it to be.

Business owners, sole proprietors, managers, supervisors and others who normally work with a Business Coach are, first and foremost, open to being coached. Quite often they:

- ◆ Seek measurable, sustainable change and empowerment
- ◆ Need to address technical areas of their business
- ◆ Want to take their business to the next level.
- ◆ Have to develop solid operating systems and procedures.
- ◆ May be preparing to sell or turn their business over to a family member.
- ◆ Work too hard (often, 50–60 hours per week or more) for too little gain.
- ◆ Find themselves procrastinating or avoiding certain duties.
- ◆ Are stressed trying to continually shoulder the challenge of producing new ideas to build their business beyond where it is today.
- ◆ Feel the need to talk with someone with deep business experience and know-how.

From one-on-one coaching to business effectiveness workshops to mastermind groups to new manager training and more, we have services to fit any budget and the burning desire to help you grow your business and see to it that you become a business titan – “one of prodigious size, strength or achievement”!

INDIVIDUAL ANALYSIS

Extended DISC® Individual Assessments are designed to provide information that makes an impact, is actionable and, most importantly, has a positive impact on performance. The Individual Assessments are self-assessments that identify the strengths and development areas of an individual. What makes Extended DISC® different from other assessments is that it is able to measure the hard-wired behaviors to exclude the impact of the environment. In practice this means that the results show who the individual actually is and not just what the person thinks he/she needs to be in the existing environment. As a result, the report identifies the true strengths and development areas to allow for real performance improvement. Their success is based on their strong ability to provide information to make better decisions.

Extended DISC® Individual Assessments have several options available to ensure you have the information you need:

- Sales Assessment • Team Member Assessment • Management Assessment • Information Technology Assessment • Leadership Assessment • Project Assessment • Customer Service Assessment
- Administrative Assessment • Training Assessment

Some of the most common applications for Personal Analysis in organizations worldwide are:

- Leadership Development • Organization Development • Communication and Interaction Skills Training
- Sales training and Sales Management Training • Customer Service Training • Coaching

TEAM ANALYSIS

From CEOs to front line employees, Team Analysis is a powerful tool that has many applications and yet is easily understood. Team Analysis provides a clear, easy-to-use framework to understand complex issues quickly, to solve problems and to improve performance. It also presents a safe environment to discuss challenging topics productively. Team Analysis provides the big picture that enables decisions to be made with confidence.

Extended DISC® Team Analysis is a tool that can combine all of the individual assessment results into one report. It shows the team dynamics, the strengths and development areas of the team, and illustrates how the team members are adjusting their behaviors in the existing work environment. Team applications are among the most popular uses of the tool and Team Analysis is capable of assessing an unlimited number of individuals. As a result, it enables our clients to perform various, more complicated analyses very cost effectively. Some of these applications include identification of the effective behaviors (leadership, management, sales and customer service), succession planning and strategic decision making.

Once the participating individuals have completed a brief Extended DISC® Personal Analysis questionnaire, you simply tell us which members you wish to include in the report. Options include:

- Maps to identify team makeup • Maps to identify style adjustments
- Team Scorecard • Team Roles

Some of the most common applications for Team Analysis are:

- Team Development • Strategic Decision Making • Identifying Effective Behaviors
- Leadership Development • Organizational Development • Succession Planning • Turnover Reduction

A Few Testimonials

"(TitanBDG) brings to the coaching model that inner sense of knowing what's behind the numbers, how they should look and what a business owner needs to do to get them there. (Their) methodology transcends the simple compliance strategies of financially based peers and results in what can only be described as sound business effectiveness. Excellence is a given here, as it should be and so rarely is."

Brendan Cunningham, President and Owner - Excelleron

"Working with Titan was one of the best decisions I've made! Their knowledge of business, law, accounting, and marketing have helped me get my business off the ground. Before finding Titan, I had spoken to a handful of "accountants" and "business coaches" that were very unsure of how to execute my goal of running both a for profit and a not for profit organization. Titan was 100% sure of my goal and was able to help in coaching, accounting, and execution. They were a joy to work with. Not only are they very well versed, they also held me accountable, and have a wonderful sense of humor. A truly wonderful experience, and an investment worth making in yourself, and in your business."
